

### Kaizen & Continuous Improvement Training (CIP)

#### **What is Kaizen and Continuous Improvement Training and how will it help my workplace?**

Life, and business, is a competition, where the strongest flourish and the weak die. If we want to beat our competition, then we need to continually look for ways to do what we do better. The companies that take their eyes off this fundamental teaching, will fall behind, and be overtaken by their competition.

Vative's continuous improvement training focuses on the way Toyota uses 'kaizen' as an underlying principle, and something that everyone practices every day.

#### **Continuous Improvement is a competitive advantage!**

Vative will work on establishing this important culture by developing the continuous improvement system within your business to a level whereby it is self-sustaining because of its ability to deliver change which motivates people to look for the next improvement opportunity.

Vative also utilises and trains in project management and root cause analysis tools such as:

- DMAIC (Define, Measure, Analyse, Improve, Control)
- Fishbone / Ishikawa / Cause and Effect Diagram
- 5 Whys
- 8Ds

The Kaizen/CIP system instils a culture of routine and encourages the entire team to work jointly on resolving waste issues within the workplace.
